Transforming Probation Services with Unilink

With decades of experience in delivering **enterprise-class software** to UK probation services, Unilink has developed a **modern, intuitive, and user-friendly interface** that enhances efficiency, streamlines communication, and simplifies workflows. The system delivers **significant time savings for staff, improves logistics and processes**, and ensures **greater accessibility**.

Unilink's **highly innovative system design** integrates **cutting-edge probation practices** with **deep domain knowledge** of data models, policy, and legislation. This expertise enables a solution that is both **robust and adaptable**, aligning with the evolving needs of the sector.

Configurable **dashboards** provide users with **clear, relevant information**, reducing complexity and supporting a **collaborative, high-performing workforce**. By defining **clear roles and responsibilities**, the system enhances productivity while adapting to **remote delivery models**, easing the burden on staff.

As a **holistic, integrated offender management solution**, Unilink's platform is designed to empower probation professionals, ensuring they can provide the **best possible service to offenders** while enhancing public safety.

"Omnia made a significant difference to the productivity of professionals because it was designed by the users for the users."

David Hood, MTC Novo

Scheduling & Management

Unilink's system **supports a full directory of services and interventions**, including **partner organizations and the private sector**, enabling seamless scheduling and delivery. From **accredited groupwork sessions to complex logistics** involved in **community service projects and placements**, the system simplifies the coordination of programs.

Fully integrated with **offender management**, the scheduling tools provide a **transformational approach** to probation practice. The platform's **user-friendly software and mobile apps** streamline intervention delivery, making **managing people, programs, and resources** more **efficient and effective**.

Assessment Tools

Unilink has extensive experience in **embedding risk assessment tools**, whether **in-house or third-party**, into offender management systems. This integration **reduces staff workload**, improves **process efficiency**, and enhances **accessibility and performance**. By **streamlining workflows and increasing interoperability**, the system delivers a **smarter, more effective approach** to risk assessment.

Probationer Reporting App

The **mobile reporting app** provides a **remote alternative** for probationers when in-person attendance is not feasible. It includes **calendar integration, secure messaging, video capabilities, and geolocation monitoring**, ensuring compliance while offering flexibility.

The system also allows for **diary management, appointment adjustments, and conflict resolution**, improving overall scheduling efficiency.

Community Service

The delivery of **Community Service (Unpaid Work)** requires a **flexible and intelligent system** that adapts to different providers and service user profiles. Unilink simplifies **administration and logistics** by offering **intuitive dashboards and operational-level screens** to efficiently manage projects and placements.

The system provides a **clear view of all offenders with UPW sentences**, allowing staff to **easily allocate individuals to projects, update records in bulk, and print daily attendance sheets**. **Non-compliance management** is seamlessly integrated through **configurable workflows and automated tasks**, ensuring **consistent enforcement and oversight** within the Community Service module.
