U-Case: The Digital Platform for Corrections

U-Case is a modular, highly configurable **Integrated Offender Management System** built on an open, flexible microservices architecture.

This **seamless case management system** supports the **entire offender lifecycle**, offering a **single, shared view** for all stakeholders. It provides **real-time access** to critical information, empowering **probation and prison staff** in the demanding custodial environment.

Modular Design: a stand-alone functional unit, or fully integrated - tailored to meet any specific needs.

Role Based Access Control (RBAC): fully customizable, allows only authorized users to view information or perform actions relevant to their role.

Dashboards: configurable user-based dashboards, allows purposeful presentation of information tailored to the different type of users and their roles

“Unilink’s experience in the criminal justice sector and their integrated suite of products, proven to help rehabilitate prisoners, is the perfect match for us to support our digital transformation strategy.”

Jan-Erik Sandlie, Deputy Director General from The Norwegian Correctional Service

Case Management

U-Case supports correctional professionals throughout the entire offender journey, from initial assessment to successful reintegration into the community.

It enables needs and risk assessment, allowing professionals to evaluate offenders and set tailored goals.

Detention planning ensures structured custody plans are developed and managed effectively, while community supervision facilitates oversight of interventions and progress tracking.

The system also supports continuous evaluation, allowing for adjustments based on ongoing assessments.

By providing a structured and adaptable framework, U-Case enhances rehabilitation efforts and promotes seamless reintegration into society.

Custodial Management

U-Case streamlines offender management by providing real-time access to critical data and offering powerful operational support for both correctional officers and prisoners.

It automates and simplifies custodial processes, reducing the administrative workload and freeing up staff time to focus on rehabilitation and offender engagement.

By enhancing efficiency and ensuring seamless, data-driven prison management, U-Case improves daily operations and fosters a more effective and rehabilitative correctional environment.
